Fault Detection Performance for IDV(1)

Hotelling's T^2 statistic — AEO vs. PCA at a common 1% false-alarm rate

Held-out performance (mean of 7 independent runs)

AEO	delay	6.3 samples (19 min)	MDR 0.008	detected in 7/7 runs
PCA	delay	6.4 samples (19 min)	MDR 0.008	detected in 7/7 runs

Detection times comparable
