Fault Detection Performance for IDV(7)

Hotelling's T^2 statistic — AEO vs. PCA at a common 1% false-alarm rate

Held-out performance (mean of 7 independent runs)

AEO	delay	0.0 samples (0 min)	MDR 0.000	detected in 7/7 runs
PCA	delay	0.0 samples (0 min)	MDR 0.000	detected in 7/7 runs

Detection times comparable
