Fault Detection Performance for IDV(14)

Combined T^2 and SPE statistics — AEO vs. PCA at a common 1% false-alarm rate

Held-out performance (mean of 7 independent runs)

AEO	delay	0.3 samples (1 min)	MDR 0.000	detected in 7/7 runs
PCA	delay	0.3 samples (1 min)	MDR 0.000	detected in 7/7 runs

Detection times comparable
