Fault Detection Performance for IDV(18)

Hotelling's T^2 statistic — AEO vs. PCA at a common 1% false-alarm rate

Held-out performance (mean of 7 independent runs)

AEO	delay	58.0 samples (174 min)	MDR 0.078	detected in 7/7 runs
PCA	delay	58.0 samples (174 min)	MDR 0.070	detected in 7/7 runs

Detection times comparable; PCA missed-detection rate lower by 10%
