Fault Detection Performance for IDV(19)

Hotelling's T^2 statistic — AEO vs. PCA at a common 1% false-alarm rate

Held-out performance (mean of 7 independent runs)

AEO	delay	266.0 samples (798 min)	MDR 0.965	detected in 1/7 runs
PCA	delay	189.6 samples (569 min)	MDR 0.913	detected in 7/7 runs

Reliably detected by PCA only
